

Woven Capital is committed to the future of mobility.

We're a team of investors, innovators, and industry experts passionate about developing the next-generation of life-changing mobility technologies.

Headquartered in Tokyo, with offices in London, Palo Alto, and Seattle, the team operates a dedicated \$800 million growth fund backed by Toyota that invests in global ventures transforming the mobility experience.

Our goal is to find and nurture innovative startups that can help our parent company, Toyota, accelerate emerging and adjacent businesses as well as leverage new and disruptive technology.

Specifically, we work with growth-stage companies that have the size, maturity, and ability to accelerate, expand, or drive operational efficiencies for Toyota within 1 to 3 years.

With an investment range of **\$10M - \$50M**, Woven Capital focuses on startups in the following areas:

Applied AI:

Data utilization, supply chain optimization, personalized user experiences

Adv. Development & Manufacturing:

Digital transformation for manufacturing, supply chain, logistics, and robotics

Energy & Circularity:

Hydrogen, solar, e-fuels, energy storage, and the circular economy

Electrification:

EV charging, battery management, battery recycling, and V2X /VPP solutions

Vehicle Intelligence:

Connected cars, Software Defined Vehicle, AD/ADAS, UX, tools and simulation

As the growth fund of Toyota, our commitment at Woven Capital is to nurture robust relationships with the company's key stakeholders through regular and purposeful dialogue, thereby enabling us to identify potential areas for collaboration, discover innovative solutions, and meet the evolving demands of the mobility industry.

When we invest in startups around the world that meet our requirements, we don't simply write a check and step away. We take an active role by connecting portfolio companies to our global network and in-house experts to refine ideas, provide guidance, build prototypes, and accelerate global scaleup.

By fostering open collaboration and strategic investments, we aim to unlock the promise of technology in solving the world's most complex challenges. By nurturing these relationships and initiatives, we are not just investing in the present, but also paving the way for a future driven by innovative mobility solutions.
